The Honorable Tom Cole
Chairman
Committee on Appropriations
U.S. House of Representatives
Washington, D.C. 20515

The Honorable Rosa DeLauro
Ranking Member
Committee on Appropriations
U.S. House of Representatives
Washington, D.C. 20515

Dear Chairman Cole and Ranking Member DeLauro:

I am requesting funding for the City of Anaheim Police Department Real Time Crime Center in fiscal year 2025. The entity to receive funding for this project is the City of Anaheim, located at 200 S. Anaheim Blvd., Anaheim, CA, 92805.

This request will provide funding for the Anaheim Police Department to acquire or upgrade advanced technology and equipment to support a Real Time Crime Center (RTCC) and Real Time Operations Center (RTOC)/Department Operations Center (DOC). This project will enable officers to proactively respond to calls for service using information gleaned from various law enforcement databases, analytical software, and video in real time to deter and solve crime, provide and share real-time intelligence, and assist with tactical support to patrol operations and critical incident resolution.

On a daily basis, officers in the field respond to calls for service and encounter criminals in various settings. By utilizing trained personnel to monitor calls for service, live camera feeds, Automated License Plate Reader (ALPR) data, and remote operated devices, coupled with data analytics and processing solutions, Anaheim police can integrate data from different sources and utilize it to drive decision making, share mission-critical information internally and with other Public Safety organizations, and process key actionable information through various law enforcement systems and databases giving responding units “real-time” support to identify, locate, and apprehend suspects, as well as deter crime and address critical incidents.

This project aligns with the purposes of section 1701(b)(8) of the Omnibus Crime Control and Safe Streets Act of 1968 (34 U.S.C. § 10381(b)(8)) by providing funding for the acquisition of advanced technology and equipment to allow the Anaheim Police Department to prevent crime and be proactive when responding to calls for service, work collaboratively

in real-time with other public safety organizations, reduce the detention of uninvolved parties, increase the timeliness and effectiveness in responding to crime, and have successful resolutions to cases and property recovery.

I certify that I have no financial interest in this project, and neither does anyone in my immediate family.

Sincerely,

YOUNG KIM
Member of Congress
